

Our expertise. Your benefit.

REAC Components - your key to success

REAC Components can help make your products more competitive, your workdays smoother, and your business more profitable. By providing craftsmanship and automation and building professional relationships .

REAC Components handles a range from single prototypes to high-volume deliveries, utilizing our 5400 m2 facility for services like laser cutting, tube bending, and milling.

Trusting REAC with all or most of your components needs will bring you the advantages of in-house manufacturing. Minimizing expenses by managing resources efficiently and maintaining quality control.

5 reasons to have fewer suppliers:

1. Quality control
2. Confidentiality and intellectual property protection
3. Better control over processes
4. Improved responsiveness
5. Design and R&D process support

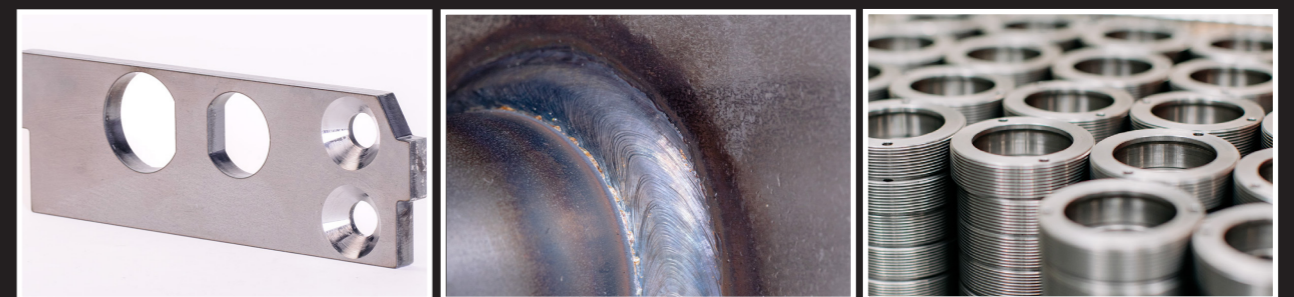

Are you tired of excessive minimum order quantities?

REAC Components is flexible enough to master everything from one hand-made prototype to reliable high-volume deliveries. Thanks to our excellent craftsmanship, our engineering expertise, and our modern, reliable production facility. Trust us to convert your 3D designs into prototypes and advanced components with our skilled craftsmanship and engineering knowledge.

We offer a wide range of technical services:

- Cutting in lengths - tubes, bars, profiles, etc.
- Laser cutting - Sheet metal plates steel and aluminium
- Edge bending
- Tube bending - 2D and 3D shapes
- Drilling - manual and CNC
- Turning - CNC and manual lathes
- Milling - CNC and manual milling
- MAG- manual and robot welding
